

Pre_Assessment.user_responses

Category screen:

Alphabet knowledge, Decoding, Word Recognition, Reading Comprehension.

Format:

```
{
  "_id": {
    "$oid": ""
  },
  "studentId": ,
  "assessmentId": "",
  "questionId": "",
  "category": "",
  "questionType": "",
  "response": [
    "Hardin"
  ],
  "isCorrect": ,
  "responseTime": ,
  "answeredAt": {
    "$date": "2025-08-20T04:50:57.600Z"
  },
  "createdAt": {
    "$date": "2025-08-20T04:50:57.600Z"
  }
}
```

Category screen:
Phonological Awareness

Format:

```
{
  "_id": {
    "$oid": "68491110988139e71b308c04"
  },
  "studentId": ,
  "assessmentId": "1",
  "questionId": "PA_001",
  "category": "Phonological Awareness",
  "questionType": "",
  "response": [
    {
      "audio": "",
      "match": ""
    },
    {
      "audio": "",
      "match": ""
    },
    {
      "audio": "",
      "match": ""
    },
    {
      "audio": "",
      "match": ""
    },
    {
      "audio": "",
      "match": ""
    }
  ],
  "correctMatches": ,
  "totalMatches": ,
  "isCorrect": true,
  "responseTime": ,
  "answeredAt": {
    "$date": ""
  },
  "createdAt": {
    "$date": ""
  }
}
```

```
}  
}
```

So all category screen data (Alphabet knowledge, Phonological Awareness, Decoding, Word Recognition, Reading Comprehension.) should be passed in the Pre_Assessment.user_reponses wit given format.

test.users

And also the readingLevel, readingPercentag, preAssessmentCompleted should be updated in test.users once the user done the Pre_Assessment.

Format:

```
{  
  "_id": {  
    "$oid": ""  
  },  
  "idNumber": ,  
  "firstName": "",  
  "middleName": "",  
  "lastName": "",  
  "age": 5,  
  "gender": "",  
  "gradeLevel": "",  
  "section": "",  
  "address": "",  
  "profileImageUrl": "",  
  "readingLevel": null,  
  "readingPercentage": null,  
  "preAssessmentCompleted": false,  
  "createdAt": {  
    "$date": "2025-09-15T08:53:50.306Z"  
  },  
  "updatedAt": {
```

"\$date": "2025-09-15T08:53:50.306Z"

}

}
